Patient

John Mathew

Patient ID

CLV-000567

Age / Gender

34 / Male

Phone

+91 98765 43210

Plan date

09 Oct 2026

Plan reference

TP-2026-00123

01 Diagnosis

- Type 2 Diabetes Mellitus (uncontrolled)
- Hypertension
- Dyslipidemia
- Vitamin D deficiency

02 Test results

Test	Result	Reference range	Unit	Status
Fasting Blood Sugar	168	70–99	mg/dL	High
HbA1c	8.2	< 5.7	%	High
Total Cholesterol	212	< 200	mg/dL	High
LDL Cholesterol	113	< 100	mg/dL	Borderline
HDL Cholesterol	36	> 40	mg/dL	Low
Triglycerides	313	< 150	mg/dL	High
Vitamin D (25-OH)	18	30–100	ng/mL	Low

CLINICAL SUMMARY

Elevated blood sugar, HbA1c, cholesterol and triglycerides indicate poor glycemic and lipid control. Vitamin D levels are low.

03 Medications

Medicine	Dose	Frequency	Duration	Instructions
Metformin 500 mg	1 tablet	Twice daily (after meals)	3 months	Take after food
Atorvastatin 10 mg	1 tablet	Once daily (night)	3 months	Take at bedtime
Vitamin D3 60,000 IU	1 capsule	Once weekly	8 weeks	Take after food
Amlodipine 5 mg	1 tablet	Once daily (morning)	3 months	Monitor BP regularly

Medication safety

Do not stop or change any medication without consulting your doctor. Report any side effects or unusual symptoms.

04 Dietary recommendations

- ✓ Follow a balanced diet with more vegetables, fruits and whole grains.
- ✓ Reduce intake of refined carbohydrates (white rice, maida, sugary foods).
- ✓ Avoid deep fried and high-fat foods.
- ✓ Increase water intake (2–3 liters/day), unless medically restricted.
- ✓ Include sources of vitamin D (milk, eggs, fish) and calcium.
- ✓ Limit salt intake and avoid processed foods.

05 Lifestyle & next steps

- 1 Exercise for at least 30 minutes daily (e.g. brisk walking).
- 2 Maintain healthy body weight.
- 3 Monitor blood sugar and blood pressure at home.
- 4 Avoid smoking and limit alcohol.
- 5 Ensure adequate sleep (7–8 hours).
- 6 Follow dietary recommendations and medication adherence.

06 Next appointment

Date
06 Nov 2026
4 weeks

Time
10:00 AM

Location
Clavis Medical Clinic, Kannur, Kerala

07 Additional tests Before next visit

Test	Purpose
Fasting Blood Sugar (FBS)	Monitor glucose control
HbA1c	Assess 3-month average glucose
Lipid Profile	Monitor cholesterol and triglycerides
Vitamin D (25-OH)	Check vitamin D levels
Liver Function Test (LFT)	Monitor liver function
Kidney Function Test (KFT)	Monitor kidney function
Urine Routine Examination	Check for protein/sugar in urine

08 Notes

- Repeat blood tests before next visit as advised by your clinician.
- Contact the clinic if you experience side effects or unusual symptoms.
- This treatment plan is based on current clinical assessment and may be adjusted as needed.
